Sedation

Dear Patient,

Thank you for choosing Jordan and Associates Gastroenterology, P.A. (JAG) for your healthcare needs. We strive to make your procedure experience with us a most pleasant one while providing the highest level of care possible. To ensure this, we are using a drug called Propofol for sedation during your procedure. Propofol provides a deeper sedation, thus reducing the awareness or pain during the procedure. Patients using Propofol also wake up much faster and have fewer side effects such as nausea and drowsiness as compared to traditional medications used for sedation.

Propofol is administered by a Certified Registered Nurse Anesthetist (CRNA). During your procedure at JAG, a CRNA from Carolina Anesthesia Associates, PA (CAA) will be administering Propofol to you. Our joint effort with CAA ensures the best care available to you by offering the state of art sedation method.

Please note, insurance plans may vary on the coverage of Propofol when done in the office setting. Should you wish to still have this drug administered during your procedure, you will receive a separate statement from CAA if it is not covered in full by your plan. **All questions concerning anesthesia billing must be directed to CAA at 1-800-951-7850, as we do not handle their billing and are unable to access their billing system.**

JAG is excited to be able to offer this Advanced Method of sedation to you in our office based endoscopy suite. We think you will be happy with the change. Again thank you for choosing JAG.

Your signature indicates that you have been made aware of our policy on Propofol, and that you agree to abide by the terms stated above.
